Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's election without traverse of claims 6 and 7 in the reply filed on 4/30/07 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Lawter (U.S. Patent number 3,378,018).

Lawter describes the storage cell (22, 21) for receiving water from a paved surface (13) defining an upper boundary; a remaining boundary (22, 20) defined by water retaining layer; means for lifting (16) and means for applying (11, 12) as called for in claim 6.

Lawter also describes the spray (12) as called for in claim 7.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 96/12067 in view of JP7-279481.

WO 96/12067 describes the storage cell for receiving water from a paved surface (1) defining an upper boundary; a remaining boundary (5) defined by water retaining layer but lacks the means for lifting and means for applying.

JP7-279481 describes a similar apparatus including means for lifting (including 18 and/or 5) and means for applying (14). The apparatus described in JP7-279481 is described as having the advantage of using recycled water to melt snow.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the WO96/12067 device to have included means for lifting and means for applying; in order to melt snow.

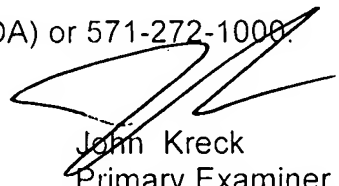

RE claim 7: JP7-279481 describes a spray.
